Mag-oil

Mag-oil for magsealed reel repair

The reel with magnetic fluid inside the fishing reel is commercialized.

When the fish reel is filled with magnetic fluid, the magnetic fluid forms an oil ring inside it.

The magnetic fluid oil ring acts as a water proof when turning. Prevent corrosion by preventing the ingress of sea water and river water for a period of time.

This increases the lifespan of the equipment.

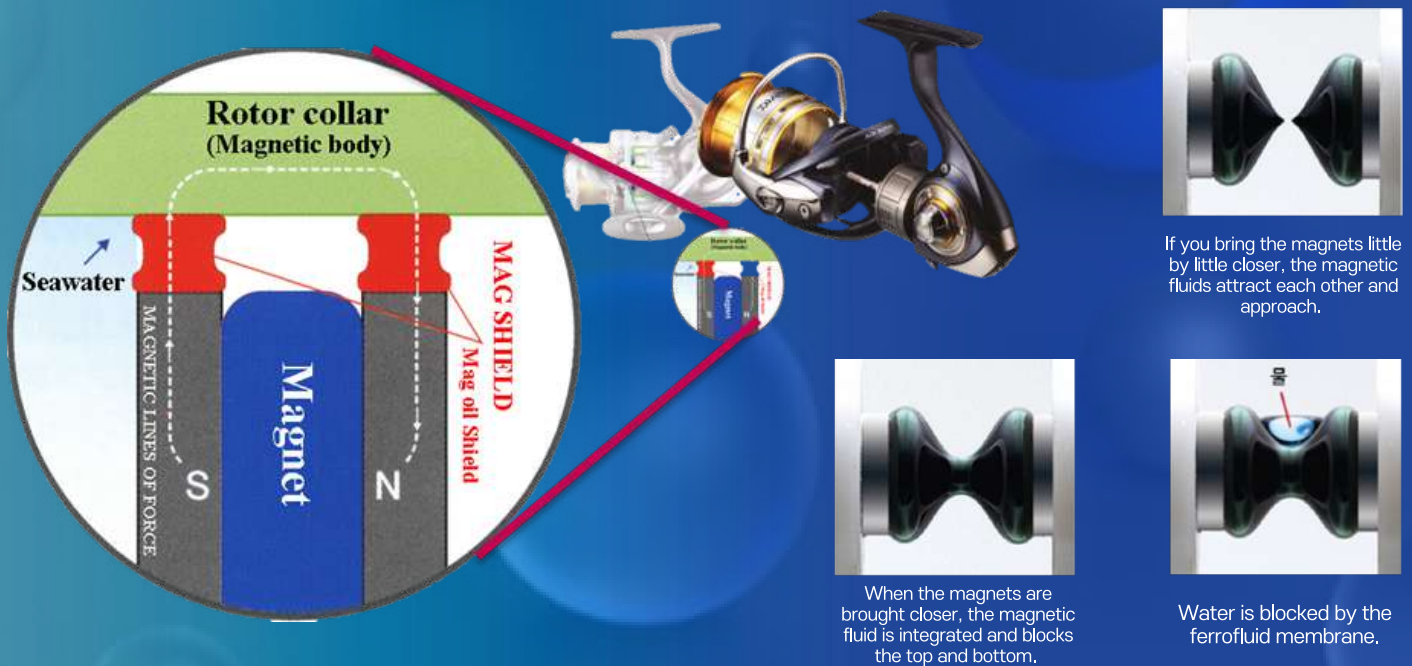

● What is Mag-oil?

Mag-oil:

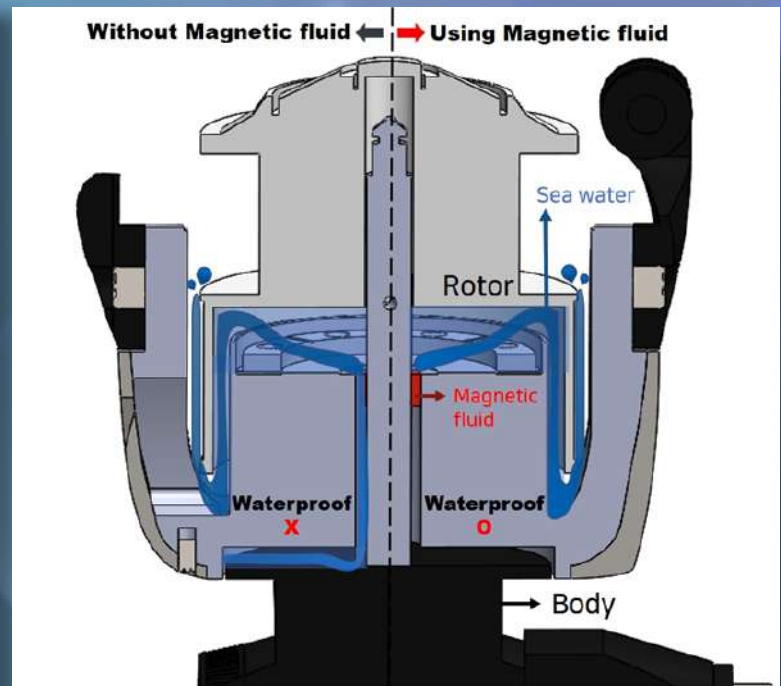

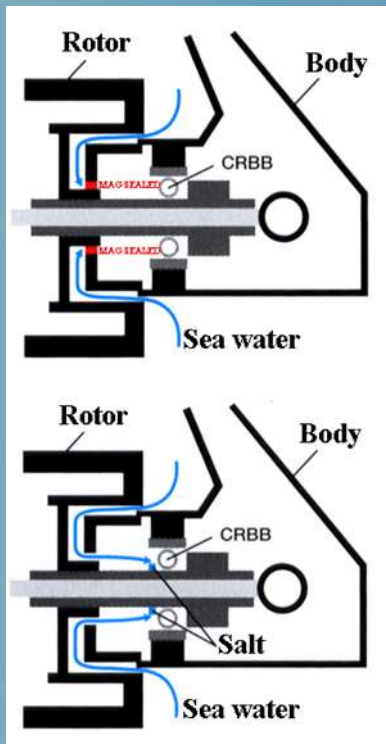

Magnetic fluid is essentially a Superparamagnetic fluid, composed of 10 nanometers of magnetic particles and oil. Water and salt are highly soluble substances. Our products are purpose-built Mac-oil to withstand these soluble and corrosive substances. In particular, sea water salt reduce the life span of the Reel. But Mac-oil can prevent it. Thus, Mac-oil is more effective in sea water.

Our current product has been validated by a number of Reel repair companies over the years.

● Principle of waterproofing

● Description of waterproofing inside the reel

Product guide

Bottle Type 0.7 ml

- Metal case + Ferrofluid bottle + Instruction manual
- Small quantity purchase is possible, please contact the head office for bulk purchase.

★ Based on Mag-oil 0.7ml criteria, it can overhaul around 45 times
 0.7ml = W7 x L7 x H7(mm) = Quantity of 7mm³
